### **DETAILED ACTION**

This is a response to the Applicant's amendment submitted on April 29<sup>th</sup>, 2005. In virtue of this amendment, claims 1-5 and 7-12 are canceled; and thus, claim 6 is now remaining active in the instant application.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Lin (U.S. Patent No. 6,259,615).

With respect to claim 6, Lin discloses, in Fig. 2, an apparatus for driving a discharge lamp [CCFL] and a corresponding method comprising (a) converting a DC signal into an AC signal (via a DC-AC), (b) filtering the AC signal to the discharge lamp [CCFL] (via C2, C3), (c) oscillating the converted DC signal such that the AC signal has a frequency based on a resonant frequency of said lamp [CCFL] (via a controller [22, 40]; see col. 7, lines 10-13), and (d) sensing a full wave current flowing through said lamp (via current sense [42]).

#### ***Remarks and conclusion***

3. Applicant's arguments filed on April 29<sup>th</sup>, 2005 have been fully considered but they are not persuasive.

With respect to Applicant's arguments on claim 6 in the second and third paragraphs at page 5, it appears that Applicant misread element "D5" in Fig. 2 of Lin as a diode, and therefore,

Art Unit: 2821

these arguments are considered invalid. "D5" in Fig. 2 of Lin is a capacitor [D5]. Since no diode is arranged between [Rs] and the lamp [CCFL], it is understood that the current sense [42], which is connected from a connection node between [Rs] and [(capacitor) D5], detects a full wave current outputted through the discharge lamp [CCFL]. As such, claim 6 remains rejected under 35 USC 102(b) as being anticipated by Lin.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
